

## ERIE COUNTY STUDENT COMMENTS 2004-05

“Very good slide show and handouts. Student involvement was also good. Teacher was very knowledgeable and handled the students well. It is a very good program and I would highly recommend it to any other school.”  
*Teacher, Huron HS*

The material presented to the high school students is very useful – MOST specifically the statistics as well as the STD presentation with graphic pictures. From an educators’ view – I think this program is vital for teens today.”  
*Teacher, Huron HS*

“The students enjoyed the props used. They were very receptive to (the) handouts. The cards were also very popular.”  
*Teacher, Adams Jr HS*

I learned so much from this program. You are really nice, cool, & fun teacher.  
*9<sup>th</sup> grade female*

This class is really fun and teaches teens a lot! I talked to my friends more about this class than any other class I’ve ever taken! Thanks for teaching us about this stuff!  
*9<sup>th</sup> grade female*

This is a very good program for teens. I have realized a lot of things from this program. It is very important that teens like me have this information.  
*Unknown*

I liked the class a lot, it showed some bad examples that happened when you have sex and it has changed my mind.  
*9<sup>th</sup> grade female*

I have learned...1 – Condoms are not as protective as the companies say they are. 2- One out of four teens older than 12 years old have a STD.  
*High school student*

I have learned that sex is not a game and the only way to be safe is to not have sex (abstinence).  
*High school student*

I learned that adding sex to a relationship can add a whole mess of problems. I also learned how many different STD’s there are I didn’t know about.  
*High school student*

I learned about the types of STD’s that you can get and what happens when you get it. I liked the water skit because I learned that when ya have sex with someone you are basically having sex with everyone that they had sex with.  
*High school student*

I have learned a lot about STD’s and that no sex is 100% safe! There is always a consequence. I have also learned that relationships that aren’t built correctly collapse at some point or time. I liked the cup demonstration. It really got me thinking! I know now I will save sex for marriage.  
*High school student*

People talk about how good and fun sex is but they never talk about how dangerous and risky it really is.  
*7<sup>th</sup> grade student*

One thing I learned this week was that marriage is the only safe place for sex.  
*7<sup>th</sup> grade student*

I learned that if you have sex before marriage and get a girl pregnant it will mess your goals and life up.
